In recent years there has been an increase in tuberculosis (TB) in cattle, and some people believe that badgers play a role in the spread of this disease amongst cattle.

Some people think that culling badgers is an important part of stopping the spread of this disease.

Others think that vaccination of badgers is a more effective solution

At the next General Election, how, if at all, might a parliamentary candidate's position on the badger cull influence your opinion of them?

- I would view a candidate more favourably if they support a cull
- I would view a candidate more favourably if they support vaccination
- I would view a candidate more favourably if they neither support a cull nor vaccination
- It would make no difference to how favourably I would view a candidate
- Don't know
