Shale gas is natural gas trapped under sedimentary rock, which is extracted using a method known as hydraulic fracturing, or "fracking". There are large reserves of shale gas in parts of England.

Some people think that using shale gas could be a solution to Britain's energy needs. Other people think that fracking is a dangerous technique that risks contaminating ground water and causing minor earthquakes.

From what you have seen or heard about the issue, do you think Scotland should or should not start extracting shale gas?

Should	23	52	25	13	13	33	47	28	32	12	33	14	16	17	21	33	27	19
