**If Scotland was to vote YES and become an independent country one of the issues that would need to be decided is what currency an independent Scotland would use. Which of the following would you most like to see?**

An independent Scotland using the pound as part of a currency union (meaning control of interest rates and monetary policy would be shared between Edinburgh and London)	42	45	47	46	54	41	43	39	55	59	43	44	34	52	44	47	43	48	48	40	46	44	47	36	43

**For an independent Scotland to enter a currency union the remainder of the UK would need to agree to share control of the pound. The Conservatives, Labour and Liberal Democrats have said that they would NOT agree to this. Do you think...**

They are bluffing in order to increase the chances of a NO vote - if Scotland does vote YES things will be different, and the remainder of the UK would probably agree to a currency union

They are not bluffing and mean what they say - if Scotland does vote YES the remainder of the UK would probably not agree to a currency union

Don't know

**Imagine that the remainder of the UK would NOT agree to a currency union with an independent Scotland. Which of the following would you then most like to see?**

An independent Scotland continuing to use the pound, but without a currency union (meaning interest rates and monetary policy would be controlled in London)

An independent Scotland setting up its own currency (meaning interest rates and monetary policy would be controlled in Edinburgh)

An independent Scotland joining the European single currency (meaning interest rates and monetary policy would be controlled by the European Central Bank)
