In 2001 Portugal decriminalised possession of drugs in an attempt to deal with a high rate of heroin addiction and HIV amongst drug users. People growing, dealing or trafficking drugs are still prosecuted, but possession of drugs for personal use has been decriminalised. Instead there has been increased investment in drug treatment programmes and harm reduction programmes. Since the policy was introduced there have been higher levels of drug treatment, the justice system has spent less time on drug-related crime, there has been less problem drug use, but a higher rate of overall reported drug use.

Would you support or oppose a similar programme in this country?
