The Economist/YouGov Poll

February 21-23, 2015

27. Keynesian economics

Some people argue that during hard economic times, the government should increase spending which will lead to businesses and people having more money to spend on goods and services which will allow the economy to recover more quickly. Other people argue that during hard economic times the government should reduce spending because increasing government debt is a bad thing and could lead to greater inflation which could destroy the value of people's savings. In general, do you think the government should increase or decrease spending during hard economic times?

The Economist/YouGov Poll

February 21-23, 2015

29. Modify or maintain terms

In 2010, a group of international creditors consisting of the European Central Bank, the International Monetary Fund, and several European nations put together an emergency bailout package in order to prevent Greece's financial collapse. The repayment terms of the bailout package required the Greek government to slash government spending by laying off government workers, selling off government assets and reducing social spending. The same group of creditors approved a second bailout package in 2012. Some people argue that the austerity measures were too strict and further damaged Greece's economy while others argued that while the austerity measures were indeed painful, they were also helping the Greek economy to recover. The newly elected Greek government ran on a platform of easing austerity measures and have demanded a modification to the terms of the agreement or else the country will enter bankruptcy. Do you think the group of creditors should... (A) Modify the terms of the bailout to ease Greek economic pain and make repayment of its debts more manageable, but risk Greece demanding further concessions in the future; (B) Maintain the current terms, even if that means Greece may declare bankruptcy and never repay its debts; (C) Not sure

The Economist/YouGov Poll

February 21-23, 2015

Sponsorship	<i>The Economist</i>
Fieldwork	YouGov
Interviewing Dates	February 21-23, 2015
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's opt-in Internet panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2010 American Community Study. Voter registration was imputed from the November 2010 Current Population Survey Registration and Voting Supplement. Religion, political interest, minor party identification, and non-placement on an ideology scale, were imputed from the 2008 Pew Religion in American Life Survey.
Weighting	The sample was weighted using propensity scores based on age, gender, race, education, news interest, voter registration, and non-placement on an ideology scale. The weights range from 0 to 6.2, with a mean of one and a standard deviation of 1.11.
Number of respondents	1000
Margin of error	± 4.6% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	21 questions not reported.
