In the past male children of the monarch took precedence over female children when it came to inheriting the throne (meaning a younger brother would have become King instead of their older sister). The law has now been changed so that men and women are treated equally in the line of succession to the throne.

Do you think men and women should be treated equally in the line of succession to the throne?

Currently the Trident system has **FOUR** nuclear armed submarines. This means that at least one nuclear armed submarine can always be on patrol, even if others are undergoing maintenance or training, and therefore the country has a continuous nuclear deterrent.

One way of having a cheaper nuclear weapons system would be if a new system only had **TWO** nuclear armed submarines, meaning there could be times when both submarines were receiving maintenance or training and there was no nuclear armed submarine on patrol.

**Which would you prefer?**
