Inheritance tax is a tax charged on the value of all assets (including the value of homes and property) that people leave when they die. The tax is currently 40% of all assets over the threshold of £325,000. A married couple can leave assets to each other without paying inheritance tax and can pool their allowance, so together they only pay inheritance tax on assets over a threshold of £650,000.

What do you think the threshold for paying inheritance tax SHOULD be for a COUPLE?
