A. Free trade with the rest of the world is good for Britain's economy, as it keeps down prices here at home, and gives British companies the best opportunity to sell their goods and services abroad

B. Free trade with the rest of the world is bad for Britain's economy, as it means that too many imports from low-wage countries enter Britain, driving down the wages of British workers and destroying some British jobs altogether

A. Competition among private-sector companies increases living standards for the great majority of people, as it leads to new and better goods and services, creates extra jobs and keeps down prices

B. Competition among private-sector companies reduces the living standards of millions of people, because it helps mainly the rich, leads to poverty wages for many workers, and often results in shoddy goods and services
