The approach many countries have taken toward drugs - of tackling the drugs problem through criminal law, banning their use and prosecuting people for possessing, selling, producing or importing drugs - has sometimes been called the "war on drugs"

Generally speaking, do you think the "war on drugs" has or has not been successful in reducing drug use?

Has been very successful	1	1	1	1	0	1	1	1	1	1	2	2	1	0	1	1	3	1	1	1	0
Has been fairly successful	14	19	15	18	10	16	14	12	15	13	19	13	14	14	15	13	17	13	16	15	10

In 2001 Portugal decriminalised possession of drugs in an attempt to deal with a high rate of heroin addiction and HIV amongst drug users. People growing, dealing or trafficking drugs are still prosecuted, but possession of drugs for personal use has been decriminalised. Instead there has been increased investment in drug treatment programmes and harm reduction programmes. Since the policy was introduced there have been higher levels of drug treatment, the justice system has spent less time on drug-related crime, there has been less problem drug use, but a higher rate of overall reported drug use.

In the Netherlands drugs have been treated as more a public health issue than a criminal issue. Possession and sale of drugs remains technically illegal, but in practice people are not prosecuted for the possession of cannabis and licenced coffeeshops are allowed to sell cannabis. Drug testing services are available for users to check drugs don't contain poisonous substances and supervised injection sites are available where addicts can use drugs with access to medical staff. Drug smuggling and trafficking remain serious criminal offences.
