Some people think that the member states of the EU should mostly spend their resources on looking after their own countries and the welfare of their own people. Other people think that the member states of the EU should pool their resources and concentrate on looking after people across the whole of the EU. What about you – on a scale of 0 to 10, where 0 means caring only about the interests of people in your own country, and 10 means caring equally about the interests of people in all EU countries, where would you put your opinion?
