Shale gas is natural gas trapped under sedimentary rock, which is extracted using a method known as hydraulic fracturing, or "fracking". There are large reserves of shale gas in parts of England.

Some people think that using shale gas could be a solution to Britain's energy needs. Other people think that fracking is a dangerous technique that risks contaminating ground water and causing minor earthquakes.

From what you have seen or heard about the issue, do you think Britain should or should not start extracting shale gas?

If has been suggested that local communities should receive compensation if fracking goes ahead in their local area. It has been suggested that compensation should be around £100,000 for each fracking rig, which would be spent on local community facilities.

Do you think this level of compensation is too much, too little, or about the right amount?

Nigella Lawson and Charles Saatchi divorced earlier this year.

Two of the couples former personal assistants are currently being tried for fraudulently using Charles Saatchi's credit cards, in a case that has revealed some details of Saatchi and Lawson's private lives.

From what you have seen or heard about the case, who do you have more sympathy for?

Nigella Lawson	39	32	37	31	36	38	34	32	34	29	35	36	31	32	33	37	27	38	33	36	27	29

The government has committed to introducing a year of shared leave for new parents by April 2015.

Currently fathers are entitled to two weeks parental leave, and after that can share some of the parental leave with their partner. The father is able to take up to six months of parental leave once the mother has returned to work, but only after the baby is 20 weeks and only as a single block.

Under the new proposal parents would be able to split parental leave between them however they wished

Imagine you and your partner were to have a child under the new proposals. Do you think you would or would not share the parental leave after the first fortnight?

[Only asked to respondents under the age of 45; n=773*]

Yes, we would probably share the leave between us
No, probably only one of us would take parental leave
Not applicable - I do not have a partner, or we would never have children

In the previous question you said you and your partner would share parental leave if you were to have children under the new parental leave rules. How do you think you would split the time?

[Only asked to respondents under the age of 45, and who would share parental leave; n=222]*

We would both take equal parts of the available parental leave
 The mother would take the majority of the parental leave
 The father would take the majority of the parental leave

In the previous question you said you and your partner would NOT share parental leave if you were to have children under the new parental leave rules. Why is that?

[Only asked to respondents under the age of 45, and who would not share parental leave; n=237]*

We would not be able to afford to financially
 It would not be suitable with my (or my partner's) employment
 It would damage my (or my partner's) future career prospects
