5. Conflict of Interest | No Blind Trust

Traditionally, presidents put their investments and business interests into a 'blind trust', meaning that their wealth is managed by an independent party and they have no knowledge of what, exactly, they are invested in. Donald Trump has decided that he will no longer be involved in running his company, but that his children will take over management of the company. Do you approve or disapprove of Donald Trump's plan to let his children run his companies while he is President?
