

1. Funding for space exploration

Should government funding of space exploration be increased, kept the same or decreased?

2. Pay for Russian rockets

Currently, the US relies upon other countries, including Russia, to get its astronauts to the International Space Station. Should the US spend the money to develop and maintain its own fleet of rockets to get to the space station, continue paying other countries to take American astronauts to the space station, or stop sending astronauts to the space station altogether?

	Gender		Age				Party ID			Voter Registration
