Don't know	12	6	17	15	22	8	15	12	3	9	11	15	N/A

Technology companies are able to secure internet communications to prevent the content of users' data (e.g. emails, messages, or social media activity) being accessed without the user's permission. In some countries, governments want companies to give them a way of accessing this data.

Which of the following comes closest to your view?

Technology companies should provide the government access to this data	31	17	40	28	38	22	24	23	27	24	21	20	20
Technology companies should secure communications in a way that prevents governments from accessing users' data	56	78	39	55	40	66	56	61	70	71	67	55	63
