Split 1: Britain is changing, becoming increasingly diverse. The 2011 census shows that White British people are already a minority in four British cities, including London. Over a quarter of births in England and Wales are to foreign-born mothers. Young Britons are also much more diverse than older Britons. Just 4.5% of those older than 65 are nonwhite but more than 20% of those under 25 are. Minorities' younger average age, somewhat higher birth rate and continued immigration mean that late this century, according to Professor David Coleman of Oxford University, White British people will be in the minority nationwide. We should embrace our diversity, which gives Britain an advantage in the global economy.

Split 2: Immigration has risen and fallen over time, but, like the English language, Britain's culture is only superficially affected by foreign influence. According to Professor Eric Kaufmann of the University of London, a large share of the children of European immigrants have become White British. Historians tell us that French, Irish, Jews and pre-war black immigrants largely melted into the white majority. Those of mixed race, who share common ancestors with White British people, are growing faster than all minority groups and 8 in 10 of them marry whites. In the long run, today's minorities will be absorbed into the majority and foreign identities will fade, as they have for public figures with immigrant ancestors like Boris Johnson or Peter Mandelson. Britain shapes its migrants, migration doesn't shape Britain.

Split 3: BLANK

Roughly 185,000 more people entered Britain																												
ast year from the EU than went the other way.																												
magine there was a cost to reduce the inflow.																												
low much would you be willing to pay to educe the number of Europeans entering																												
ritain? Pay nothing. Numbers remain at 185,000.	38	60	18	38	30	56	68	13	29	48	55	18	40	36	47	43	35	25	46	27	43	33	36	40	49	37	42
