The Economist
YouGov
February 24-27, 2016
U.S. citizens, aged 18 and over.

Respondents were selected from YouGov's opt-in Internet panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2010 American Community Study. Voter registration was imputed from the November 2010 Current Population Survey Registration and Voting Supplement. Religion, political interest, minor party identification, and nonplacement on an ideology scale, were imputed from the 2008 Pew Religion in American Life Survey.

The sample was weighted using propensity scores based on age, gender, race, education, news interest, voter registration, and nonplacement on an ideology scale. The weights range from 0.1 to 4.08 , with a mean of one and a standard deviation of 0.8.

2000
$\pm 2.9 \%$ (adjusted for weighting)
$\pm 3.1 \%$ (adjusted for weighting)
